

Dynamics in Economic Geography

Table of contents

1	What is economic geography?	9
1.1	Introduction	9
1.2	The rediscovery of economic geography	10
1.3	Location, distance and networks	16
1.4	Industry and environment	18
1.5	Conclusion	21
2	Regional development in a global society	23
2.1	Introduction	23
2.2	The founding fathers of classical economics and globalization	23
2.3	Drivers of globalization	28
2.4	Globalization: Different perspectives	34
2.5	The market: An essential mechanism?	36
2.6	Outcomes of globalization	38
2.7	The end of globalization?	40
2.8	Conclusion	42
3	Classical and neoclassical location theory	44
3.1	Introduction	44
3.2	Classical economics: Minimal costs	45
3.2.1	Agricultural land use according to Johann Heinrich von Thünen	45
3.2.2	Industrial location according to Alfred Weber	50
3.2.3	Refining the linear connection between distance and transport costs	59
3.3	Neoclassical economics and the role of the market	62
3.3.1	Hierarchy and distribution of services according to Walter Christaller	62
3.3.2	Locational competition according to Harold Hotelling	70
3.3.3	Markets according to August Lösch	72
3.4	Conclusion	73
4	Competitive regions: Agglomeration and New Economic Geography	75
4.1	Introduction	75
4.2	Cumulative causation	76
4.3	Perroux's growth poles	79
4.4	Agglomeration benefits	81
4.5	New Economic Geography: The core model	89
4.6	Conclusion	92

5	How decisions are really made: The behavioural approach	94
5.1	Introduction	94
5.2	Bounded rationality and heuristics	95
5.3	Allen Pred's behavioural matrix	97
5.4	Locational preferences and firm relocations	100
5.5	Regional images and place branding	106
5.6	The hunt for the creative class	115
5.7	Conclusion	117
6	Why rules matter: The institutional approach	119
6.1	Introduction	119
6.2	Institutions, the rules of the economic game	120
6.3	Playing by the book? Game theory	127
6.4	Institutions and location choice	130
6.5	Conclusion	136
7	The slow pace of change: Evolutionary economic geography	137
7.1	Introduction	137
7.2	New business activities	139
7.3	Boom and bust: Innovation and the theory of long economic cycles	145
7.4	Clustering as a result of evolutionary processes	152
7.5	Policy implications	157
7.6	Conclusion	160
8	Stimulating regional welfare and well-being	161
8.1	Introduction	161
8.2	Comparing regions and countries, GDP and competitiveness	162
8.3	What is value and welfare?	167
8.4	Regional economic policies	175
8.5	State intervention through public policy: The tools	179
8.6	Market organization and planning	180
8.7	Conclusion	181
9	Epilogue	182
9.1	Introduction	182
9.2	Economics and geography	183
9.3	Location choice and regional economic growth	184
9.4	Regional growth and development	185
9.5	Innovative and sustainable regions: Evolution of thinking	185
	Bibliography	188
	Index	196
